

Pinnacle Codeworks

Proposal for Neural Forge Database Development

Introduction:

This proposal is in response to Neural Forge's request for a database development to further the growth of AI and GPUs. Pinnacle Codeworks is confident in our experience with development and data visualization to confidently create a database that meets the needs of Neural Forge.

Resume:

The team's background and experience is provided in the resume attached.

Experience:

As a group, we have:

- Used MySQL to create relations
- Created data visualizations, like dashboards, using Tableau
- Worked with ReadySet Surgical to create a database to securely store medical information
- Created ASP.NET EF Core backend for the Franklin County Auditor

Known Languages/Tools:

- Languages: C#, Python, Java, C++, SQL, HTML, CSS
- Tools: Tableau, PowerBI, Microsoft Suite, ASP.NET

Quote:

Our estimated cost for the project is \$320,000. This is based on a team of four members receiving \$150/hr.

Conclusion:

Thank you for taking the time to review Pinnacle Codeworks as a development partner. We, at Pinnacle Codeworks, would be excited to aid Neural Forge in the development of a database to further the growth in AI and GPU.

For any questions, do not hesitate to reach out to businessoffice@pinnaclecodeworks.com for clarification. We look forward to the potential of combining the efforts of Pinnacle Codeworks with Neural Forge.

Sincerely,

Alyx Snyder

Database Development Team
